

Leverage Clausematch to Drive Compliance and Better Support Your Team

Compliance teams are stretched thinner than ever, as they are required to do more, with the same or fewer resources. Keeping up with the speed of the market and emerging regulations on a daily basis has become even more difficult, amidst an uncertain political and economic background.

Did you know that investing in a compliance document management system can strengthen governance, free up your team to focus on high-value tasks, help you meet obligations and gain the Board's confidence, while cutting costs by up to 30%? Ditch the spreadsheets and generic tools that are unfit for purpose, and empower your compliance team with a streamlined and highly scalable solution that is tailor made for the needs of compliance teams.

Benefits

Meet compliance obligations

Clausematch allows you to safely meet your compliance obligations. Our advanced metadata, and AI-powered mapping and tagging capabilities connect policies, procedures, and controls down to a granular, paragraph level. Combined with intelligent reminders and suggestions, they empower your team to be on top of changes and make sure no document is outdated.

Prevent liability

Failure to comply is getting personal. It may not only result in steep fines and reputational damage. It can now lead to director-level penalties that include jail time. With Clausematch, companies can tighten up their controls, seamlessly link sanctions and requirements to the relevant policies and procedures, with a complete audit trail. They are not only able to meet obligations, but also to prove that they are doing so.

Build trust with the board and regulators

Evidence compliance, with a complete audit trail that tracks and stores all modifications made to a document, build reports and dashboards to demonstrate that staff is adherent and all is in place to meet the most recent requirements and guidelines.

Establish a culture of compliance

Having policies that are not followed is worse than having no policies at all and can lead to organizations not meeting their regulatory obligations. Companies need to ensure their documents are being seen, accessed, attested to, and adopted within the organization. With Clausematch, compliance teams can quickly disseminate the latest policy updates across the company, train staff more effectively, and easily track adherence with real-time reports for all stakeholders.

Reduce administrative burden, save time and cut costs

Reduce the amount of time it takes to draft, edit, review, approve, publish, refresh, or archive policies and procedures. Clausematch's solution provides a centralized, digital repository where businesses can store, organize and update their policies as well as collaborate seamlessly across different departments, in real time. It eliminates the back and forth of emails and versioning conflicts, dramatically reducing the time your most senior team members spend on manual tasks.

Boost efficiency

According to a recent study, 30% of compliance professionals felt they lacked adequate resources to support their compliance program. Clausematch provides a single source of truth to assist regulated organizations in efficiently driving compliance without adding additional headcount. Organizations can encourage collaboration across departments by granting them access to create and edit documents in real time, speeding up the approval process by up to 50%.

Be audit-ready, at all times

Avoid the stressful process of collecting and organizing policies and procedures when a compliance audit is approaching or when new regulations are published. With Clausematch, compliance teams can adequately prepare their company for an upcoming audit and prove to regulators that they have a mature compliance process in place.

Clausematch empowers organizations to:

Meet regulatory obligations, prevent company and director-level liability

Build a scalable, agile and sustainable compliance program

Receive presentation-ready reporting to evidence compliance and manage staff adoption and adherence.

Compliance Success Stories:

“Clausematch’s system itself is flexible and has been easily configurable to our needs, and through the implementation we have learned how to ensure it is future-proofed for the continued growth in scale and complexity of our business.”

Ben Lowing

Risk & Compliance Director

“We are delighted to be working with Clausematch to enhance our policy management solution. They will be able to support us in managing the critical evolution of our policies and procedures as we continue to grow and expand.”
